EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Page 1, paragraph 0001, line 2, insert "now U.S. Pat. 6,723,214" after "January 2, 2002".

Page 1, paragraph 0001, line 3, insert "now abandoned" after "October 29, 1998".

This is done to update the status of the applications cited therein.

The following is an examiner's statement of reasons for allowance:

Claims 1-17 are allowable over the prior art of record because the prior art of record does not teach the claimed process kit including a bridge coupling the inner ring to the body, wherein the cylindrical inner flange, the cylindrical outer flange, the inner ring, the bridge and the body form a single piece cover ring.

Claims 18 and 19 are allowable over the prior art of record because the prior art of record does not teach the claimed process kit including a bridge connecting the inner ring and the body, wherein the cylindrical inner flange, the cylindrical outer flange, the inner ring, the bridge and the body comprise a contiguous ceramic cover ring.

Claim 20 is allowable over the prior art of record because the prior art of record does not teach the claimed process kit including a ceramic ring having an inner ring

coupled to and having a common upper surface with the inner diameter of the body, the inner ring and body defining a gap therebetween and a bridge connecting the inner ring and the body; a waste ring as claimed; a stainless steel pedestal as claimed and a plurality of ceramic rest buttons as claimed.

The closest prior art of record to Tepman (EP 0 776 990) teach a shield ring with a tapered centering flange, an outer flange and a raised inward extending roof. Tepman fails to teach the inner ring utilizing a bridge to connect the inner ring to the body which has the inner and outer flanges. The Examiner misconstrued the inward extending roof of Tepman as a ring. Applicant's prior art also demonstrates an extending roof as seen in Fig. 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M- Th with Every other Friday off.
